Joe Hyla

The Next
Columbian Players Production
in May, 1968:

THE FANTASTICKS
a musical fable

DIRECTOR'S NOTES

Ostensibly a story about the Nazi role in the extermination of European Jews during World War II, this play is, in actuality, a study of those inevitable antagonists in warfare: the victors and those vanquished. Miller characterizes people caught in the frightful net of a "round-up" by the new government; he also shows us the men who must carry out the orders of their superiors, no matter what their personal convictions. Out of this conflict rises a picture of one part of mankind as a persecutor and the other as persecuted, often weak, sometimes indecisive and ultimately resigned to his condition. There are no "heroes" in this play; that is a term applied after the fact — and what happens after the end of this play is history.
